

YOUR ULTIMATE BULK TRANSFER SYSTEM

WALINGA®

INDUSTRIAL ULTRA-VEYOR

The Walinga ULTRA-VEYOR is the ultimate system for your bulk transferring needs. This push system moves bulk by air, maximizing accessibility for any handling or storage facility. Move your bulk safely without potentially dangerous augers or airborne particulates and dust. ULTRA-VEYOR systems are remarkably efficient and easily maintained with all moving components and service points located on the base unit. The system is usually installed semi-permanently wherever it's needed, but needs can change. Integrated forklift lift points make base unit relocations a breeze.

Walinga ULTRA-VEYORs handle the requirements of most operations with models ranging from 10+ tonnes/hr to 75+ tonnes/hr. Ultra-Veyor Systems are flexible, expandable and easy to install.

> Ask any WALINGA customer and they'll tell you "Invest in a WALINGA, the shop hand you can trust!"

ALL ULTRA-VEYOR INSTALLATIONS ARE UNIQUE Do it yourself or ask the experts! Walinga is

there to support you. Whether a retrofit or new installation, Walinga offers all the options imaginable to improve your bulk reclamation or transfer needs. It doesn't stop there, don't be afraid to ask for what you don't see, our CAD manufacturing process facilities prompt one-off solutions.

IT'S ALL IN THE DETAILS

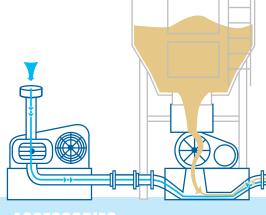

Details like welded heavy-duty steel platforms that not only keep the elements away from moving parts, they are designed with integrated forklift pockets for portability when desired and built to last.

LEADERS IN PNEUMATIC CONVEYING SYSTEMS

Walinga products are ripe with innovative solutions. When you engage with Walinga, your relationship extends beyond the simple purchase of a Walinga product. Walinga not only listens to their customers, they engage in conversation.

DID YOU KNOW?

Many standard features start out as customer initiated design projects. Throughout the year Walinga engineers review and collect customer feedback. Sometimes customers only outline a opportunity for improvement, some might offer the bones of a solution and occasionally one will go as far as sharing something specific they've fabricated for themselves. Each year Walinga engineers build a full size working prototype incorporating the best of these ideas and annually invite customers to come play with it. Changes might be made, some features may not prove worthy, but ideas that work will become standard production items.

BLOWER PACKAGE

WALINGA SUPER HARDENED COATING SRT BLOWER

Experienced in the manufacturing of feed and grain handling equipment, Walinga is first for quality. Walinga blowers are fabricated from special alloy castings that facilitate hardening. Walinga's proprietary Super Hardened Coating process out-performs chrome hardened finishes. The process eliminates premature wear from abrasive dust, ensuring a much longer life than unhardened blowers.

THE WALINGA DROP THRU AIRLOCK

Designed for maximum efficiency and minimal bulk damage the airlock housing is precision machined from a cast iron shell for unequaled performance. The 10 vane fabricated steel rotor has adjustable stainless steel tips for longer life. Walinga's latest innovations include the modification of the inlet and outlet ports with flow contours for maximum capacity. To minimize bulk damage and improve performance, a special rotor wiper levels the pockets. The entire assembly is powered by an electric gear box. A chain drive transfers power to the airlock. Each system can be customized to your production needs.

SAVE ENERGY & MONEY! Ultra-Veyor Smart-Flo

WALINGA®

Smart-Flo™

Smart-Flo™ Variable Frequency Drive Systems monitor and automatically adjust motor speeds, optimizing performance while reducing energy costs and bulk damage.

- Reduces product damage
- Equipped with a sensor and **PLC that continually monitor** the system, adjusting air speeds to maximize transfer capacity
- Smart-Flo

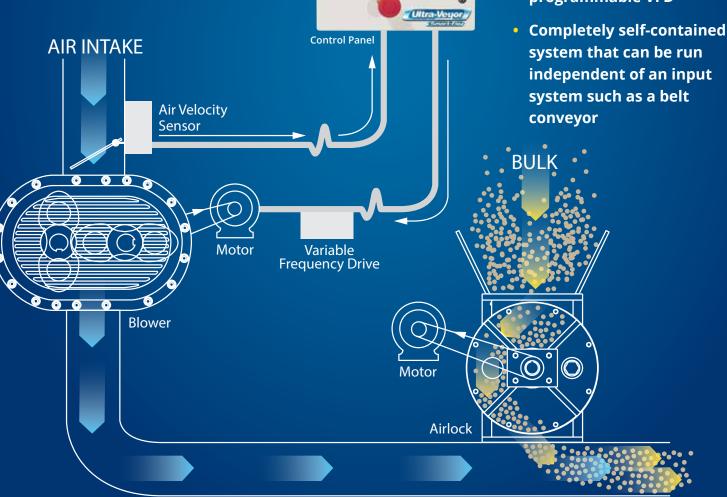

Ultra-Veyor

- Automatically adjusts blower speeds to maintain bulk integrity and reduce energy costs
- Can be customized to be installed with any common programmable VFD

Capacities based on moving dry corn approximately 100' (30.4m). Barometric pressure, humidity, and condition of product will affect capacity. Due to continuous product development, specifications are subject to change without notice.

For systems that will be conveying spring wheat or soybeans, please deduct 30% from the maximum stated capacity

YOUR ULTRA-VEYOR GROWS AS YOU GROW

It's always nice to plan ahead and avoid expensive upgrades. The Walinga Ultra-Veyor system is so flexible, easy to install or retro-fit that you can add to your system as your business grows. Choose from an extensive selection of options and specifications to perfectly match your current business demands and keep those hard earned dollars in your pocket.

SAFETY

The Ultra-Veyor moves bulk product virtually dust and damage free without the use of heavy augers or booms. Maintenance is performed easily at ground level with simple access to all filters, belts and lubrication points.

ALL INCLUSIVE TWO YEAR WARRANTY

Walinga endeavors that new equipment be free from defects in material and workmanship. The warranty period is either two years from purchase or 500 hrs. of operation, whichever occurs first. Full terms and conditions are available from Walinga or your local Walinga dealer.
