WALINGA[®]
VALUE BEYOND THE PRODUCT

MULTI-LEVEL LIFT LOADING

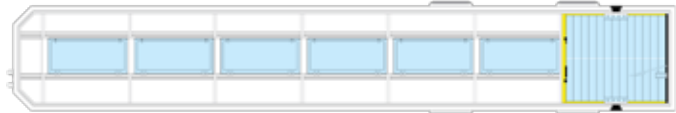

One of Walinga's core competencies is automated control systems. One such system monitors and logs trailer humidity and temperature. The system alerts the driver who then manually adjusts electrically driven blinds and fan speeds via in-cab tablet or remote. Option a fully automated monitoring system and the unit automatically adjusts to maintain an optimal environment based upon continuous monitoring.

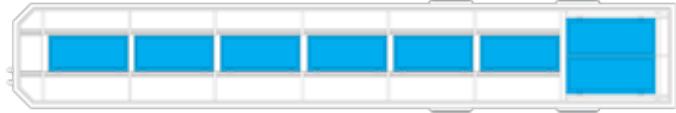

LIFT LOADING

SPECIFY 2, 3, 4 or 5 LEVELS [weaners, feeders, market, breeding stock]

LIFT ACCESS TO EACH LEVEL

ROOFTOP DOORS & FLOORS OPEN FOR EASIER HANDLING AND REMOVALS

MANUAL OR AUTOMATIC WEATHER BARRIERS, SIDE ACCESS DOOR

LIFT Interior: Standard feature: Hydraulically assisted decks and roof panels lift out of the way for easy clean-out.

3-DECK RAMP LOADING

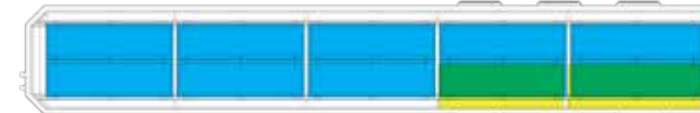

Working directly with customers during concept, design, production and post production stages produced a highly efficient, user friendly trailer. The trailer above incorporated both a roll-up lower and top deck barn door on DS with a second full height barn door on CS. Specified features that facilitate quicker unloading at locations that can manage this. Three levels, each with five sections, provide pen space in excess of 1120 sq ft., that's more animals per load. The bogie, controls, doors, ramps, and more are all sourced or built domestically.

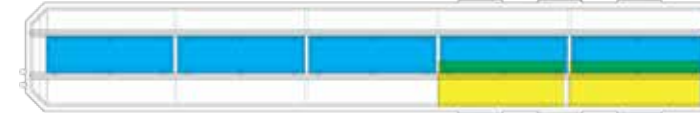

RAMP LOADING

THREE RAMP ACCESSIBLE LEVELS

SINGLE OR DOUBLE ROOFTOP DOORS & FLOORS OPEN ALLOWING FOR EASIER HANDLING & REMOVALS

MANUAL OR AUTOMATIC WEATHER BARRIERS, SIDE ACCESS DOOR

Controlled by remote or in-cab tablet, both AWT units incorporate electronically driven blinds that provide natural ventilation, controlling humidity and temperature inside the unit.

RAMP Interior: Standard feature: Hydraulically assisted decks, roof panels and ramps lift out of the way for easy clean-out.

REVOLUTION AWT • ANIMAL WELFARE TRAILER

Walinga presents the REVOLUTION AWT (Animal Welfare Transport). Designed to be easier on the animal, easier to load and unload, easier clean-outs and easy on fuel, the Revolution AWT incorporates years of live transport expertise. Advanced partition designs manage animal proximity and density.

Ventilation systems, adjustable blinds and access to water (drinking nipples/water misters) minimize animal stress during transport. Specify a LIFT•AWT model with 2, 3, 4 or 5 levels dependent upon usage (weaners, feeders, market, breeding stock). Specify the RAMP•AWT 3 level hog model for maximized transport efficiencies and animal welfare. Every Walinga component is resolved to withstand the continuous hard use while maximizing animal welfare and bio-security.

Manually operated, hydraulically assisted roof and interior floor panels lift to ease handling and expedite clean-outs or removals. Roof can be retracted for increased ventilation.

Partition systems provide safer and more comfortable animal transport. Intelligently designed for easier loading, unloading and clean outs. It's all in the details, maximized to minimize operator effort.

Controlled via in cab tablet or remote, forced air ventilation throughout all AWT units helps prevent animal overheating and dehydration. Another feature intended to lower animal stress.

Water distribution throughout the trailer (drinking nipples) ensure livestock remain cool and hydrated during transport.

Mister wash systems are standard equipment. Structural details, like capped tubing, eliminate hard to reach hiding places for feed or animal waste.

STANDARD FEATURES

- Steel bogie
- Manually operated horizontal curtains/blinds
- One rear door
- One side access door
- Hydraulically assisted flip up ramps/floors
- Hydraulically assisted roof openings
- Trucklite™ splice-less electrical harness
- Aluminum controls cabinet
- Air ride suspension

OPTIONAL FEATURES

- Aluminum bogie
- Powered horizontal curtains/blinds
- UHMW Curtain/blind upgrade
- Remote controlled cooling fans
- Water distribution system
- Misting system
- On board power (batteries)
- 120V Charger
- Wireless handheld remote
- Advanced control pkg.
- Camera monitoring system
- Temperature and humidity monitoring system
- Wash ports
- Sign box
- Tire carrier
- Hubdometers
- Custom toolboxes
- Configurable doors
- Disinfectant system
- Blow gun & 8' Air wand
- Custom Interior & Exterior LED lighting
- Custom paint finishes
- and more....
