**MOBILE STAR**

- control solutions

FEEDLOK is a revolutionary concept in distributing feed from the feed mill to the farm.

- Right Feed...Right Bin...Every time!**  
 FEEDLOK provides security and assurances, knowing that the correct feed is always delivered to the correct bin.
- No more wrong deliveries.**  
 Assign your feed mixture to precise GPS bin locations. Once learned the system remembers bin GPS coordinates indefinitely.  
*\*Any future changes or additions to bin locations are easily updated.*
- Assign feed loads to a bin and FEEDLOK does the rest.**  
 It's as simple as the bins actual GPS location matching the FEEDLOK booms assigned GPS record. Wrong GPS bin location and FEEDLOK will not allow dispensing of the feed mix.
- Always know where your trucks are unloading!**  
 FEEDLOK systems provide GPS tracking as well as time stamped detailed record keeping.  
 Always know exactly when a delivery was made and to what bin.
- Notifications.**  
 A mismatched feed-to-bin halts the transfer. The system both audibly and visually notifies the operator. Any manual override requires a security code be entered. If manual override is engaged FEEDLOK delivers notifications to the server for complete tracking.

## Easy Operator Set up!

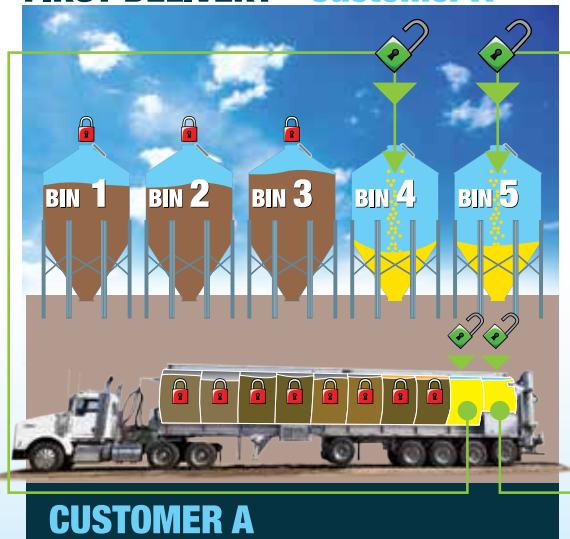

Simply complete a delivery run with your Feedlok Equipped unit in "Training Mode". Align the boom over each customer bin, lock in that bins precise GPS coordinates while assigning your own unique bin names. Accurate to within a couple feet, that bins GPS location and name are recorded in the system indefinitely\*.

**FEEDLOK Dashboard**

*FEEDLOK delivers all these features right at your desktop! It's easy to use...easy to set up... and FEEDLOK will pay for itself quickly with no more wrong deliveries.*
