# CONVEY 65 TONS of PEANUTS per hour\* WITH MINIMAL SHELL DAMAGE

## 7614 DLX PEANUT-VAC

The recognized leader in pneumatic bulk transfer systems, Walinga was approached by the peanut industry to engineer a solution that addressed the specific properties unique to the in shell peanut and its transport. Floating on a pillow of air still requires finesse to prevent shell damage. Direction changes, flow inconsistencies and in-flight collisions all need to be managed to ensure a damage free journey.
